Dynseo

A toolbox with many advantages

CAREGIVERS ADAPTATION

This toolbox includes all the solutions the caregivers need to take care of their elders. Games work without Wifi and are well-adapted to the assisted population.

CAREGIVERS VALORIZATION

Caregivers thus have a mission with higher added value. It's rewarding for them, and reassuring. They have all the adapted tools to take care of their elders and gives them confidence..

SELF-ESTEEM FUND

Self-esteem is very important and a simple manicure can have a lot of impact on how you see yourself.

COGNITIVE SIMULATION OF BENEFICIARIES

They receive the benefits on their memory and wait for the speaker with impatience. They discover new technologies, which allows them to better integrate into today's world.

CREATING LINKS

Professionals use the tablet is meditation, to share a pleasant moment with them dealing with more fun and less stressful topics.

REASSURING FAMILIES

Families are thus reassured to know that their close family member are stimulated cognitively and discover new technologies.

A complete and varied toolbox

Thanks to the Caregiver's Toolbox, each caregiver, home care services, companion care services, or home health services benefit from tools that will help them take care their elders, by alternately offering them fun tablet apps (which work without wifi) or physical activities.

The Caregiver's Toolbox includes:

Apps to :

- Stimulate elders and adults' memory (Stim'Art Scarlett)
- Work motricity (The Rolling Ball)

Other apps selected by our team (to have fun and relax...)

No failure.
Several levels of difficulty to adapt to the pace of everyone.

WITHOUT WIFI

The games work without internet, you can play in all conditions.

THE FOLLOW-UP OF SUZIE

Suzie analyzes your performance of the last week, and every Monday she gives you a summary.

UPDATES

Every month you'll discover new games or new content.

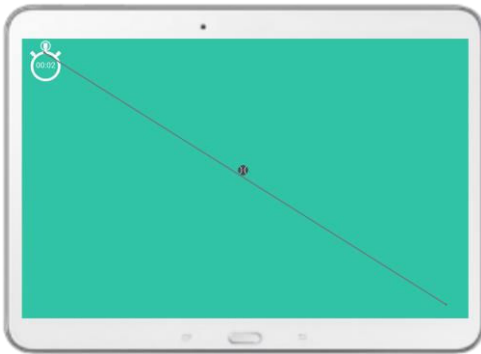

The Rolling Ball

The Rolling Ball is our tablet app that exercises fine motor skills. The tablet is used as pendulum support to move the ball on the screen.

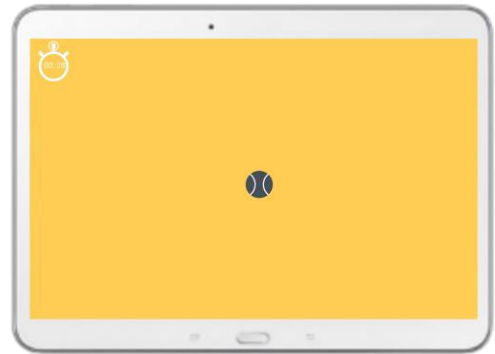

The proposed exercises allow functional rehabilitation in people with movement and coordination disorder (Parkinson, dyspraxia...).

A variety of exercises :

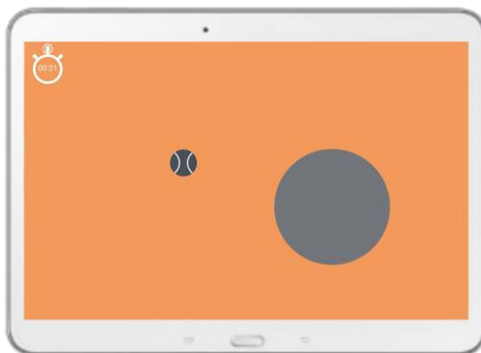

FOLLOW THE LINE

You can choose several trajectories, and then use the tablet as a pendulum to follow the line.

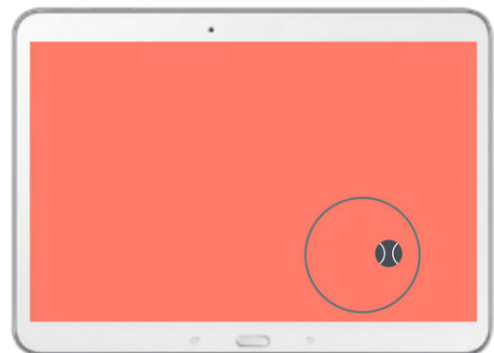

KEEP IT AT THE CENTER

The goal is to keep the ball at the center of the screen for a limited time

CHASE THE CIRCLES

Make the ball roll through the circles that appear on the screen.

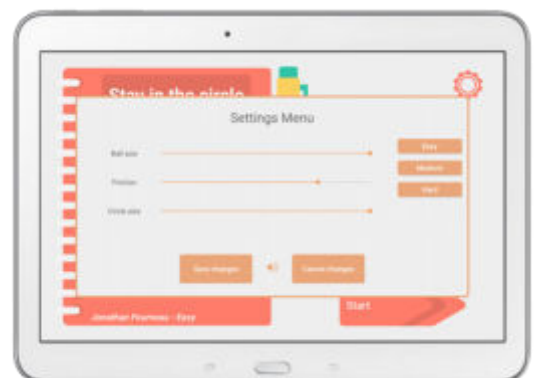

STAY IN THE CIRCLE

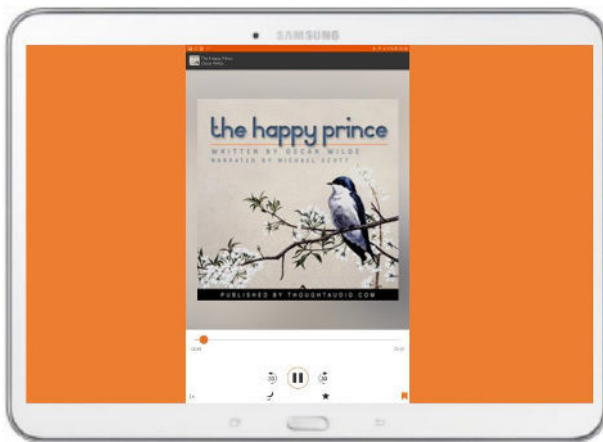

Keep the ball inside the circle

With the Rolling Ball, several functions are stimulated: attention, location in space, fine motor skills, working memory, executive functions (including adaptation to situations, to the exercise's objects) and bimanual coordination.

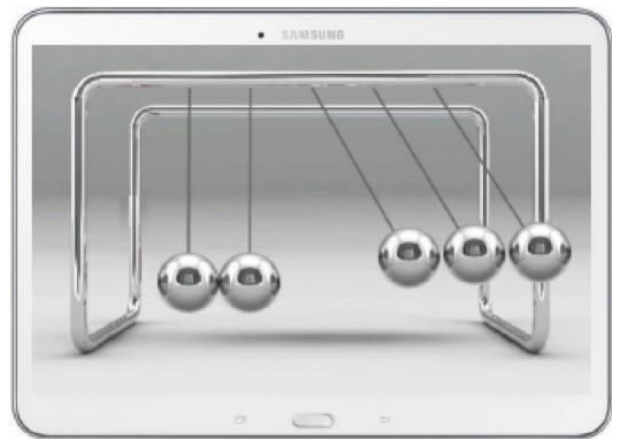

The speed of the ball, as well as the size are adjustable in the settings and allow you to adjust the difficulty of the exercise.
